

## CERTIFICATE OF COMPLIANCE

### European REACH, RoHS 3 - Plated NdFeB Magnets

Material Type	Product Description
Neodymium Iron Boron (NdFeB) Magnetic Material	Nickel plated (electrolytic process, no lead used) NdFeB magnets of all grades, shapes, and sizes

This declaration certifies that the above material is not REACH compliant due to presence of Nickel in plating.

REACH Compliance:

This communication is to assist with identifying the presence, if any, of SVHC and RSL substances in the product(s) we supplied.

Substances of Very High Concern (SVHC) Chemicals: REACH Annex XIV is the Candidate List of Substances of Very High Concern (SVHC) that is published by the European Chemicals Agency (ECHA) located at <http://echa.europa.eu/uk/regulations/reach> and is current.

Restricted Substances: REACH Annex XVII is the Restricted Substance List (RSL) published by the European Commission that identifies restrictive conditions of certain chemical substances, mixtures, and articles located at: <http://echa.europa.eu/web/guest/regulations/reach/substance-identity>

Being that we cannot control the destination of this product, we must notify the buyer that the part is plated with an element that is listed on List of Substances of Very High Concern (Nickel), in concentrations above the 0.1% by weight threshold. Handling of this part must be done using latex or rubber gloved hands.

This declaration also certifies that we agree to notify you of any future SVHC substances or RSL substances that are present in these products at a concentration of 0.1% by weight or greater and/or are in violation of restriction outlined in Annex XVII and subsequent amendments.

RoHS Compliance: RoHS 3 Directive 2015/863/EU

In addition, we certify that the material noted above is RoHS 3 compliant and contains less than 0.1% by weight of: lead (Pb), cadmium (Cd), mercury (Hg), hexavalent chromium (Cr6+), polybrominated biphenyls (PBB), polybrominated diphenyl ethers (PBDE); and phthalates Bis(2-ethylhexyl) (DEHP), Benzyl butyl (BBP), Dibutyl (DBP), and Diisobutyl (DIBP). These content percentages represent maximum concentration levels of homogenous materials. We certify that we will notify you of any exemption that applies and specify the exemption number.

Please be aware that the information being provided regarding the substances contained in these products comes from reviewing information provided by suppliers or producers of the raw materials used in the above products. Formal testing has not been conducted to determine the presence of these substances in the above products.

This proprietary information is considered business-sensitive and should only be used for environmental, health and safety purposes.
